Strategic and national security of the Russian Federation to 2020

I. General provisions

1. Russia has overcome the consequences of the system of political and socio-economic crisis end of the 20th century - stopped decline and quality of life of Russian citizens, prevented abject nationalism, separatism and international terrorism, re-established the possibility of building its competitiveness and promote national interests as key subject emerging multi-polar international relations. Implemented policy of the State of national defence, State and public security, sustainable development of Russia, adequate internal and external conditions. For strengthening the system of national security, consolidated legal space. Resolved priorities in the economic sphere, increased investment attractiveness of the national economy. Are being revived native Russian ideals, spirituality, respectful to historic memory. Strengthened public consent based on shared values - freedom and independence of the Russian State, humanism, inter-ethnic peace and unity crops multi-ethnic people of the Russian Federation, respect for family traditions, patriotism. In General, formed the preconditions for reliable prevention of internal and external threats to national security, dynamic development and the Russian Federation in one of the leading powers on the level of technical progress, quality of life of the population, impact on world processes.

In the context of globalization processes of world development, international political and economic relations, generate new threats and risks for human development, society and State, Russia as a guarantor of successful national development goes to the new State policy of national security.

2. The main areas of national security of the Russian Federation are strategic national priorities, which defines the task critical social, political and economic transformation to create safe conditions of implementation of constitutional rights and freedoms of citizens of the Russian Federation, the implementation of sustainable development of the country, preserve the territorial integrity and sovereignty of States.

3. The national security strategy of the Russian Federation to 2020 - officially recognized system of strategic priorities, objectives and measures in the field of internal and external policies, determinants of national security and sustainable development of the State.

Conceptual for national security are based on the fundamental interrelationship and interdependence of national security strategy of the Russian Federation to 2020 and the concept of long-term socio-economic development of the Russian Federation for the period until 2020.

4. This strategy is a basic instrument for development planning system of national security of the Russian Federation, which outlines the procedures and measures to ensure national security. It is the basis for constructive engagement of the public authorities, organizations and public associations to protect national interests of the Russian Federation and the safety of individuals, society and State.

5. The main objective of this strategy consists in creating and maintaining national security forces of the internal and external conditions favourable to the implementation of strategic national priorities.

6. This strategy are the following concepts:

"national security" - protection of the individual, society and the State of internal and external threats, which allows for constitutional rights, freedom, decent quality and level of life of citizens, sovereignty, territorial integrity and sustainable development of the Russian Federation, defence and security of the State;

"national interests of the Russian Federation" - the combination of internal and external needs State in ensuring protection and sustainable development of the individual, society and State;

"threat to national security" - the direct or indirect damage constitutional rights, freedoms, decent quality and level of life of citizens, sovereignty and territorial integrity, sustainable development of the Russian Federation, defence and security of the State;
"strategic national priorities" - the main areas of national security, which are constitutional rights and freedoms of citizens of the Russian Federation, sustainable socio-economic development and protection of national sovereignty, independence and territorial integrity;
"system of national security" - forces and means to ensure national security;
"forces of national security" - armed forces of the Russian Federation, other troops, military formations and bodies in which federal law provides for military and law enforcement service (or), as well as federal public authorities involved in ensuring national security state under the laws of the Russian Federation;
"means of ensuring national security" - technology, as well as technical, software, socio-linguistic, legal, organizational tools, including telecommunication channels used in the system of national security for the collection, processing, transfer or receive information on the status of national security and measures to strengthen it.

7. The forces and means to ensure national security were focusing its efforts and resources on ensuring national security in the internal political, economic, social spheres, in science and education, international, spiritual, information, military, the Defense - Industrial and environmental spheres, as well as in the area of public security.

II. the modern world and Russia: status and trends

8. Development of the world is globalization of all spheres of international life, which was dynamic and interdependence of events.
Between States exacerbated conflicts related to the uneven development by глобализационных процессов, deepening the gap between levels of well-being. Values and models of development were the subject of global competition.
Increased vulnerability of all members of the international community face new challenges and threats.
As new centres of economic growth and political influence is qualitatively new geopolitical situation. Is a tendency to find a solution of problems and crisis situations on a regional basis without the participation of non-regional forces.
Failure of the existing global and regional oriented architecture, especially in the Euro - Atlantic region, only to the North Atlantic Treaty Organization, as well as insufficient legal instruments and mechanisms increasingly threaten international security.

9. The transition from confrontation to cluster principles многовекторной diplomacy, and resource potential of Russia and pragmatic policies use opportunities of the Russian Federation to strengthen its impact on the world arena.
The Russian Federation has sufficient capacity to count on the establishment in the medium term conditions for its consolidation in the number of States leaders in the world economy based on the effective participation in world Division of labour, increasing global competitiveness of the national economy, defence capability, level of State and public security.

10. At the national interests of the Russian Federation a negative impact will be apparent recurrences of unilateral approaches in international relations, contradictions between the main actors in world politics, the threat of proliferation of weapons of mass destruction and its terrorists, and forms of unlawful activities in cyber- and biological areas, in the high tech. Increase global information infighting, increase threats to stability industrialized and developing countries of the world, their socio-economic development and democratic institutions. Will nationalism, xenophobia and violent extremism, separatism, including under the slogans religious radicalism. Would intensify world population situation and problems of the environment, increase threats associated with uncontrolled and illegal migration, drug trafficking and trafficking in persons, other forms of transnational organized crime. Probably epidemics caused by new, previously unknown viruses. Greater will be a scarcity of water.

11. The attention of the international policy in the long term will focus on the possession of sources of energy, including in the Middle East, the Barents Sea and in other Arctic areas, in the Caspian Sea basin and in Central Asia. Negative impact on international environment in the medium term will continue to the situation in Iraq and Afghanistan, conflicts in the near and Middle East, in some countries of South Asia and Africa, on the Korean peninsula.

12. The critical state of physical security of dangerous materials and facilities, particularly in countries with unstable political situation, and not controlled by the proliferation of conventional arms can exacerbate existing and new regional and inter-State conflicts.
Compete for resources are not excluded coping with the use of military force - can be disrupted established balance of forces near the borders of the Russian Federation and the borders of its allies.
Increase the risk of increasing the number of States of the holders of nuclear weapons.
The possibility of maintaining global and regional stability significantly сужаются when Europe elements of the global missile defence system of the United States of America.
Consequences of the world's financial and economic crises may become comparable on accumulated damage scale - out the use of military force.
13. Long-term Russian Federation will strive to build international relations on the principles of international law, secure and equal security of States.
To protect their national interests of Russia, while remaining under international law, will hold a rational and pragmatic foreign policy, intending to eliminate expensive confrontation, including a new arms race. The United Nations and the Security Council of the United Nations Russia sees as a central element of stable system of international relations, a respect, equality and mutually beneficial cooperation of States, based on civilized policy instruments permissions global and regional crisis situations.
Russia will enhance the interaction in such multilateral formats as "the Group of eight", "group of twenty" Rick (Russia, India and China), the BRIC (Brazil, Russia, India and China), and use other informal international institutions.
The development of relations of bilateral and multilateral cooperation with States parties to the Commonwealth of independent States is for Russia's foreign policy. Russia will seek to develop the capacity of regional and subregional integration and coordination in the States members of the Commonwealth of independent States in the first of all the Commonwealth of independent States, as well as the Treaty on collective security and the Eurasian Economic Community, providing a stabilizing influence on the general climate in the regions bordering States parties to the Commonwealth of independent States.
The Organization of the collective security treaty Keystone Interstate tool designed to resist regional challenges and threats of military and political and military strategic nature, including combating illicit trafficking in narcotic drugs and psychotropic substances.
14. Russia would strengthen the Eurasian Economic Community as a kernel economic integration, promote the implementation of large water - energy, infrastructure, industrial and other joint projects, primarily regional importance.
15. For Russia of particular importance will be strengthening political capacity of the Shanghai Cooperation Organization, promoting the practical steps that strengthen mutual trust and partnership in Central Asian region.
16. The Russian Federation was in favour of the greatest strengthening mechanisms for interaction with the European Union, including the progressive establishment of common spaces in the areas of economy, external and internal security, education, science, culture. Long-term national interests of Russia is the formation in euroatlanтике open system of collective security within a clear legal basis.
17. The determining factor in relations with North Atlantic Treaty Organization remain unacceptable Russia plans advance military infrastructure Alliance to its limits and attempts to make it global functions, contrary to international law.
Russia is ready to develop relations with North Atlantic Treaty Organization on the basis of equality and to strengthen the universal security in the Euro - Atlantic region, depth and content of which will be determined by the willingness of the Alliance to integrate the legitimate interests of Russia in the implementation of the political and military planning, respect for international law, as well as to their further transformation and search for new tasks and functions of humanistic orientation.
18. The Russian Federation will strive to set up equal and full strategic partnership with the United States of America on the basis of interests and taking into account the key the influence of Russian - American relations on the status of the international environment. As priorities will remain the achievement of the new arrangements in the field of disarmament and arms control, confidence, as well as issues of non - proliferation of weapons of mass destruction, capacity anti-terrorist cooperation, resolve regional conflicts.
19. In the international security Russia commitment use political, legal, economic, military and other instruments of protection of State sovereignty and national interests.
A predictable and open foreign policy is inextricably linked with sustainable development of Russia. The successful integration of Russia in global economic space and the international system of Division of labour difficult low rate of transfer of the national economy on the innovative development path.
20. To prevent threats to national security need to ensure social stability, ethnic and конфессиональное consent, improve the mobilisation and growth potential of the national economy, to raise the quality of the work of the public authorities and establish effective mechanisms for their interaction with civil society in order to implement the citizens of the Russian Federation the right to life, security, labour, housing, health and healthy life, to accessible education and cultural development.

III. national interests of the Russian Federation and the strategic national priorities

21. The national interests of the Russian Federation for the long term are:
in the development of democracy and civil society, improving the competitiveness of the national economy; in ensuring the inviolability of the constitutional order, territorial integrity and sovereignty of the Russian Federation; in making the Russian Federation in the world power, which is aimed at maintaining strategic stability and mutually beneficial partnerships in a multipolar world.
22. Internal and external needs sovereign States in ensuring national security are implemented through strategic national priorities.
23. The main priorities of national security of the Russian Federation are national defence, State and public safety.
24. To ensure national security, the Russian Federation, together with the achievement of the main priorities of national security, focuses its efforts and resources on the following priorities for sustainable development: improving the quality of life of Russian citizens by safeguarding the personal security, and also high standards of life; economic growth, which is achieved primarily through the development of national innovation system and investment in human capital; Science, technology, education, health and culture, by strengthening the role of the State and improve public-private partnership; Ecology living systems and environmental management, maintenance of which is achieved through balanced consumption, development of advanced technologies and appropriate replacement natural-resource potential of the country; strategic stability and equitable strategic partnership, which are being strengthened through active participation of Russia in the development of a multipolar world order model.

IV. National security

25. The main contents of national security is in the maintenance of legal and institutional mechanisms and resource capacity of the State and society at the level of responsible national interests of the Russian Federation. Status of the national security of the Russian Federation directly depends on the economic capacity and effectiveness of the system of national security.

1. The national defence

26. Strategic objectives of improving national defence are to prevent global and regional wars and conflicts, as well as in the implementation of strategic deterrence in the interest of military security. Strategic deterrence involves the development and system implementation interrelated political, diplomatic, military, economic, information and other measures aimed at pre-empting or threat of negative action by the aggressor State (coalition of States).

Strategic deterrence is using economic opportunities of the State, including resource support of national security, through the development of military-patriotic education of citizens of the Russian Federation, as well as military infrastructure and management system military organisation of the State.

27. The Russian Federation provides national defence, based on sound principles of sufficiency and effectiveness, including through the methods and means of non-military response mechanisms public diplomacy and peacemaking, the international military cooperation.

28. The military security is provided by development and improvement of the military organization of the State and defence capacities, as well as the allocation of sufficient financial, material and other resources. Implementation of strategic objectives of national defence is through the development of national security, the promising military-technical policy and development of military infrastructure, as well as by improving the system of the military organization of the State and set of measures to increase the prestige of the military service.

29. Public policy of the Russian Federation in the area of national defence and military construction, including within the Union State, long-term aims at improving the Russian Federation armed forces, other troops, military units and bodies, to the development of the military-political environment to ensure security, sovereignty and territorial integrity of the State.

30. The threats of military security are: policy a number of leading foreign countries, the predominant superiority in the military sphere, particularly in strategic nuclear forces, through the development of high-precision, information and other high-tech tools of the armed struggle, strategic arms in nonnuclear, unilaterally global missile defence system and over-militarization околоземного of outer space, capable of causing could, as well as on the proliferation of nuclear, chemical, biological technologies, the production of weapons of mass destruction or its components and means of delivery.

Negative impact on the status of military security of the Russian Federation and its allies is exacerbated by the departure from international agreements on limitations and arms reduction, as well as efforts to violation of the sustainability of Government and military administration, warning of missile attack, control of outer space, the functioning of the strategic nuclear forces, storage sites of nuclear weapons, nuclear energy, nuclear and chemical industry, other potentially dangerous objects.

31. The Russian Federation implements long-term State policy in the field of defence through the development system underlying conceptual, policy documents, as well as planning documents, standards of legislative regulation of public authorities, institutions, enterprises and organizations of the real economy, civil society
2. The State and public security

35. The strategic objectives of national security in the field of State and public security are the protection of the foundations of the Russian Federation, the fundamental rights and freedoms, the protection of sovereignty of the Russian Federation, its independence and territorial integrity, as well as preserving civil peace, political and social stability in society.

36. The Russian Federation in ensuring national security in the field of State and public security in the long term was permanent improving law enforcement measures to detect, prevent, combat and disclosure of acts of terrorism, extremism, other criminal attacks on human rights and freedoms and the citizen, property, public order and public security, the constitutional order of the Russian Federation.

37. Основными источниками угроз национальной безопасности в сфере государственной и общественной безопасности являются: разведывательная и иная деятельность спецслужб и организаций иностранных государств, а также отдельных лиц, направленная на нанесение ущерба безопасности Российской Федерации; деятельность террористических организаций, группировки и отдельных лиц, направленная на насилие и насилие в отношении основ конституционного строя Российской Федерации, дезорганизацию нормального функционирования органов государственной власти (включая политических, общественных, иных организаций, предприятий и учреждений, обеспечивающих жизнедеятельность общества, ущербку населения, в том числе путем применения ядерного, химического оружия либо опасных радиоактивных, химических и биологических веществ; экстремистская деятельность националистических, религиозных, этнических и иных организаций и структур, направленная на нарушение единства и территориальной целостности Российской Федерации, дестабилизацию внутриполитической и социальной ситуации в стране; деятельность транснациональных преступных организаций и группировок, связанная с незаконным оборотом наркотических средств и психотропных веществ, оружия, боеприпасов, взрывчатых веществ; сохраняющийся рост преступных посягательств, направленных против личности, собственности, государственной власти, общественной и экономической безопасности, а также связанных с коррупцией.

38. The main Government policies in the field of State and public security in the long term should be strengthening the role of the State as guarantor of the security of person, especially children and adolescents, improved regulatory legal regulation of preventing and combating crime, corruption, terrorism and extremism, improving the protection of rights and legitimate interests of Russian citizens abroad, enhanced international cooperation in enforcement.

39. Provision of State and public security in the long term will also contribute to enhancing the effectiveness of enforcement and intelligence services, create a unified State system for prevention of crime (especially among minors) and other offences, including monitoring and evaluating the effectiveness of enforcement, development and use of special measures aimed at reducing corruption and the criminalization of social relations.

40. В целях обеспечения государственной и общественной безопасности: совершенствуется структура и деятельность федеральных органов исполнительной власти, реализуется Национальный план противодействия коррупции, развивается система выявления и противодействия глобальным вызовам и кризисам современности, включая международный и национальный терроризм, политический и
The task of ensuring national security in emergency situations is achieved by improving the effectiveness of the segments), its integration with similar foreign systems.

improved and development of a single State system of prevention and elimination of natural and man-made (including territorial and functional powers of local self-government in the field of safety of life of the population, fleet technological equipment and improvement of armed conflict near its border, the incompleteness of the international legal discharge of the State border of the Russian Federation with individual neighbouring States.

The security threat in the border area are the activities of international terrorist and extremist organizations for the transfer to Russian territory their emissaries, means of terror and sabotage the cross - border criminal groups on the illicit movement across the border of the Russian Federation in narcotic drugs, psychotropic substances, products and goods, aquatic biological resources, other material and cultural values, the channels of illegal migration. Negative impact on the effective protection and the State border protection of the Russian Federation has insufficient border infrastructure and technical facilities of the border authorities.

The decision of the security tasks of the State border of the Russian Federation is achieved by creating high - tech and multifunctional border complexes, particularly at the borders with the Republic of Kazakhstan, Ukraine, Georgia and the Azerbaijani Republic, as well as improve the efficiency of the State border protection, in particular in the Arctic zone of the Russian Federation, in the far East and on the Caspian direction.

National security in emergency situations is achieved through the improvement and development of a single State system of prevention and elimination of natural and man-made (including territorial and functional segments), its integration with similar foreign systems.

The task of ensuring national security in emergency situations is achieved by improving the effectiveness of the powers of local self-government in the field of safety of life of the population, fleet technological equipment and production technologies to potentially dangerous sites and objects, introduction of modern technical means to inform and alert population mass stay, as well as developing a system of preventive measures to reduce the risk of terrorist acts and mitigate the effects of man-made and natural emergency nature.

The Russian Federation strengthens national defence, provides State and public security in order to create an enabling domestic and external conditions for achieving the priorities of socio - economic development of the State.

3. Improving the quality of life of Russian citizens

The strategic objectives of national security in improving the quality of life of Russian citizens are reducing the level of social and property inequalities, stabilization of population in the medium term, and in the long term - improve the demographic situation.

Improving the quality of life of Russian citizens are guaranteed by ensuring personal safety and comfort, high - quality and safe goods and services, decent pay activity.

The sources of threats to national security can be factors such as crises world and regional financial and banking systems, increased competition for scarce commodity, energy, water and food resources, development of advanced technological ways to improve strategic risks depending on changes to external factors.

National security in improving the quality of life of Russian citizens will contribute to reducing the level of organized crime, corruption and drug addiction, countering criminal formations in the legalization of their own economic framework, socio - political stability and momentum of the Russian Federation, the sustainability of development finance and banking system, extended reproduction mineral base, the availability of modern education and health, high social mobility and support for socially significant employment, skills and quality of labour resources, managing migration flows.

One of the main directions of national security in the medium term is defined by the food security and guaranteed supply of high quality and affordable medicines.

The food security is provided through the development of biotechnology and import substitution on basic food, and by preventing the depletion of land resources and reduction of agricultural land and arable land, the capture of the national grain market foreign companies, the uncontrolled spread of food products from genetically modified plants using genetically modified micro - organisms and micro - organisms, with genetically modified analogues.
51. For the development of the pharmaceutical industry are conditions for overcoming commodity dependence from foreign suppliers.
52. To counter threats to national security in improving the quality of life of Russian citizens forces national security, in collaboration with civil society institutions:
   - improve the national system of protection of human rights through the development of the judicial system and legislation;
   - promote well-being, reduce poverty and differences in to ensure sustainable access of all categories of citizens to the necessary for healthy lifestyles to the number of foodstuffs;
   - create the conditions for health, fertility and mortality of the population;
   - improve and develop transport infrastructure, increase the protection of the population of natural and man-made;
   - updated protection against unemployment, create conditions for participation of people with disabilities are rational regional migration policies, pension system, standards of social support for certain categories of citizens;
   - conserving cultural and spiritual heritage, the availability of information technologies, as well as information on various socio-political, economic and spiritual life of society;
   - improve public-private partnership to strengthen the logistics of health, culture, education, housing development and improve the quality of housing and communal services.

4. Economic growth

53. The strategic objectives of national security are the occurrence of Russia in the medium term in the number of five countries - leaders by volume of gross domestic product, and achieving the required level of national security in the economic and technological spheres.
54. National security through economic growth is achieved through the development of national innovation system, enhance productivity, the development of new sources, modernization of the priority sectors, improving the banking system, financial services sector and inter-budgetary relations in the Russian Federation.
